JANUARY—MARCH, 1913

We take pleasure in presenting to the Trade this, the first issue of our Wholesale Price List for 1913. New Crop Seeds are now in stock and ready for distribution, and we are confident, notwithstanding many short crops that we can serve you as well as ever. In the Plant Department our stocks of decorative, hardy and other plants are very extensive and in splendid condition, comparing favorably to stock distributed by us in the past. We trust you will favor us with a share of your patronage which we promise will be given the most careful attention.

ORDER EARLY

WE respectfully request that our wholesale customers send in their orders as early as possible. While we aim to give every order proper attention at all seasons of the year, yet during the spring rush there is liable to be delays, hence the advisability of anticipating your wants and ordering early.

SHIPPING.—By our careful and thorough system of packing, we **Guarantee Safe Delivery** of plants and perishable goods, when ordered to be sent by **Express**, and we always ship this way unless we have positive instructions to the contrary, and **when sent in any other way, are solely at purchaser's risk.**

PRICES.—This list cancels all previous offers. The prices quoted in this list are net, and subject to no discounts. Articles offered in our Retail Catalogue or Garden Book and not offered in this list will be supplied at retail prices less the following discounts, viz.: Vegetable and Flower Seeds in packets, Bulbs and Plants, 33 $\frac{1}{3}$ %; Small Tools and Insecticides, 10%.

No order for **PLANTS** or **BULBS** amounting to less than \$1.00 will be filled and packed at wholesale prices. Orders received from the trade for Plants or Bulbs amounting to less than \$1.00 will be charged for at retail prices, less 10 per cent.

TERMS OF BUSINESS.—Unknown correspondents desiring to open an account will please furnish three references to parties in the trade with whom they have had credit relations, otherwise cash must accompany order.

Remittances should be made by Post-Office Money Orders, Drafts on New York or Philadelphia banks, or Express Money Orders. Where it is not possible to obtain these, the letter should be registered. We cannot guarantee receipt of money sent in any other way.

Goods desired C. O. D. must be accompanied by a partial remittance to guarantee acceptance.

All goods are offered subject to being unsold on receipt of order, and we reserve the right to advance prices without notice.

No charge is made for boxes or packing, nor for delivery to Freight Depots or Express Offices in Philadelphia.

In filling out your order always give **Shipping Directions**, and write **Name and Address Distinctly** on each and every order.

NON-WARRANTY.—We wish it to be distinctly understood that although we continue to take all possible pains to supply only New, Genuine and Unadulterated Seeds, Plants and Bulbs, we still give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any of the Seeds, Plants or Bulbs we send out, and will not be in any way responsible for the crop. Every order received for articles named in this Catalogue will be executed on these conditions only.

DREER'S SUPERB ASTERS

We take special pains to secure only the choicest Asters, and nothing better in quality can be had at any price.

American Grown Asters

The varieties offered on this and the head of next page are all American grown and stand at the head of Asters for the American climate.

The stocks have all been grown under our own supervision, and we know that the quality in every case is as fine as can be had at any price and much superior to what can be produced from most sources.

Dreer's "Peerless Pink" Aster.

This grand Aster may briefly be described as a glorified late branching shell-pink or Mary Semple. It has the same strong, sturdy habit of growth; comes into bloom a little earlier, bears freely almost globular flowers rarely under 4 inches across and frequently over 5 inches. The color is rich shell-pink, similar in shade but more decided than the late branching. The centre petals are prettily incurved while the wide outer petals are reflex making a most artistic and finely finished flower and stands out longer than any other. 50 cts. per trade packet; \$2.50 per oz.

Dreer's "Pink Beauty" Aster.

A magnificent cut-flower variety, in bloom from early August until well on in September; 24 to 30 inches high; flowers average 4 inches across, on long, strong stems. Color a delicate blush pink, and pronounced by experts to be the finest pink midseason sort yet introduced. 50 cts. per trade pkt; \$4.00 per oz.

Crego's Giant Comet Asters.

Magnificent fluffy flowers, averaging over 5 inches across, with long strong stems; the finest of this type. Comes into bloom in August, continuing well into September, and, unlike most of the Comet sorts, stands when cut and is a good flower to ship. We offer two colors, our own saving, of the highest quality.

	Tr. pkt.	Oz.
Shell-pink	40	\$2 00
Snow-white	40	2 00

MIKADO ASTER

Mikado Asters.

Very similar to Crego's Giant but dwarfer and earlier. Flowers of largest size rarely under 5 inches across, borne on good long stems, we offer two colors.

	Tr. pkt.	Oz.
Mikado Pink or Rochester	40	\$2 00
Mikado White	40	2 00

Giant Comet Asters.

Giant Branching. Finest mixed, long stems and fine for cutting 25 1 00

Dreer's "Crimson King" Aster.

A superb new late-branching variety, with perfect double flowers of rich, rosy crimson, full of fire. Fine for cutting, showing up well under artificial light. 40 cts. per trade pkt; \$2.00 per oz.

Dreer's Superb Late Branching Asters.

The finest Asters for late August and September blooming. The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers, which, under ordinary cultivation average 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. We offer eight beautiful and distinct colors, viz:

Dreer's Superb Petunias

Our Riverton grown strain of Double and Single Fringed Petunia have long been celebrated as the best on the market. We keep continually culling out and hybridizing and thus maintain the high standard. We frequently test stocks from the world's best growers and can say, without fear of contradiction, that our own strain is by far the best to be had at any price.

Note.—We would especially call the attention of every florist who grows Double Petunias from seed that all the smallest and weakest seedlings should be saved, as they usually produce the finest double flowers. The same is true of the singles, the strong seedlings being inclined to "weediness."

Dreer's Superb Double Fringed. Our own unrivaled strain. Every seed saved at Riverton. Mixed colors. 75 cts. per 500 seeds; \$1.50 per 1000 seeds.

Dreer's Superb Double Fringed White. Saved from the finest type of fringed pure white, carefully hybridized. \$1.00 per 500 seeds.

Double Fringed Imported. Seeds are saved by one of the foremost European growers; the best that can be had abroad. \$1.00 per 1000 seeds.

Dreer's Superb Single Fringed. All our own saving from the finest large fringed flowers. Mixed colors. 50 cts. per tr. pkt.; \$1.00 per 1/2 oz.; \$1.50 per 1/4 oz.

Asparagus Plumosus Hatcheri.

It would hardly be possible to praise this new type too much, and it has already made a name for itself among the most critical growers. It is of very rapid growth, the fronds set closer on the stems than the very best type of Plumosus Nanus, making a fuller, heavier string and when cut lasts longer in good condition than any other and is just as good for bunching as the old sort. We will not be surprised if it quickly becomes the leading variety.

New Chrysanthemum Frutescens or Marguerite.
Mrs. F. Sander.

This variety, first sent out by us two years ago, has practically replaced all other white Marguerites. It is not only the most valuable variety as a cut flower, but also as a pot plant for Easter, while in some sections of the country it has also been found a profitable summer proposition planted out of doors.

Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures 5 inches across; the centre of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. It is but rarely that a flower comes single, and when such is the case, they are as beautiful as the double forms; they are produced on long stems with a freedom not known in other varieties of the Marguerite.

CYRTOMIUM ROCHFORDIANUM

Fine Ferns of Special Merit

Adiantum Farleyense Gloriosa.

The Glory Fern or Ruhm von Mordrecht.

The Fern Which Will Revolutionize the Cut Frond Business.

For the grower of Ferns for cutting this new Maiden Hair will undoubtedly prove a most important addition; it closely resembles *Adiantum Farleyense* and will make a splendid substitute for that fancy variety and it can be produced at much less cost, as it will thrive under conditions in which *Adiantum Farleyense* could not exist.

At our Riverview Nursery we have given it a very fair trial for this purpose during the past winter. A block of these plants were planted on a bench in a house devoted to the ordinary Boston Fern and received the same treatment and temperature given to the *Nephrolepis*, and they developed not only fronds of great beauty on longer, stiffer stems than *Farleyense*, but also many more fronds than would be developed by that variety in the same length of time under the most favorable conditions.

Anyone who successfully grows the ordinary varieties of *Adiantum* such as *Cuneatum*, *Croweanum* and *Hybridum*, can grow it under precisely the same conditions given to these sorts.

2 1/4-inch pots, \$1.50 per doz.;	\$12.00 per 100;	\$110.00 per 1000

Pteris Childsi.

This beautiful variety is to *Pteris* what *Farleyense* is to *Adiantums*, and like that variety produces no spore, so that propagation is by the rather slow method of division, which will keep it a rare variety. The plant is of strong growth, attaining a height of about 20 inches; fronds large, pinnae deeply dentated and undulated, tips crested. Makes a beautiful specimen for exhibition

Specimen plants, 75 cts. each.

Polypodium Glaucum Cristatum.

A perfect gem and entirely distinct from all other Ferns, and a splendid subject to grow into specimen plants; the fronds attain a height of about 2 feet, and are of a metallic glaucous-blue color, with the edges of the pinnae wavy and crispate, giving the plant a graceful, unique appearance. 75 cts. each.

The New Hydrangeas

The Great Easter Novelty of the Year

All of the varieties here offered have been tested by us under ordinary conditions as to their adaptability to forcing for Easter, with the intention of discarding any that proved unworthy.

To our surprise and gratification, all have proven themselves valuable additions.

While it is true that the average florist may ultimately select only a half dozen sorts as meeting his particular requirements, it is manifestly impossible for us to make the final selection for him.

In view of the condition explained above, we continue to offer the full set at a special price to enable the grower to try all the varieties and determine for himself which most nearly meets his particular requirements. These are all supplied in dormant plants.

Avalanche. A splendid large white, which has made a reputation for itself during the past two seasons; an easy variety to force.

2 1/4-inch pots, \$0.75 per doz.; \$5.00 per 100.

DREER'S SELECT ROSES.

Select Two-year-old stock for your Retail Trade

The Roses which we here offer are, with few exceptions, field grown stock either American grown or plants that have been imported from England and Ireland.

These plants are all potted up during December and January, stored in cold houses, so that they break away naturally in spring, making this the best possible stock for selling to the retail customer.

The prices noted are for strong plants in 5 and 6-inch pots (according to the growth of the variety) for delivery during April and May, and while we will make shipments earlier if requested, we prefer to book orders for these months only.

HARDY PERENNIAL PLANTS.

For many years Hardy Perennials have been one of our principal specialties and our stock at the present time is unquestionably the most complete both in quantity and variety in the country.

Many planters not thoroughly familiar with this class of plants have an idea that nothing but a large, field-grown clump will give satisfactory returns the first season. This, as experience has taught us, is in most instances a mistake. A vigorous plant of proper size will, in nearly every case, give quicker and better returns than the best so-called "field-clumps" that can be procured. This fact is particularly appreciated by the leading Landscape Architects throughout the country who use Perennials in large quantity, the majority of whom give preference to the Dreer pot-grown plants. It will be noticed that the majority of the stock offered in this list is described as being 3, 4 or 5-inch pots. This does not necessarily mean that the plants have been altogether pot-grown, but that they have been field-grown and dug and potted up during the Fall and early Winter months, and such stock can be planted, even late in the Spring, with practically no loss, which, in the case of clumps, is often quite serious.

A New Race of Phloxes, *P. Arendsi*.

At the great international exhibition held in London in May, 1912, where this new type of Phlox received an award of merit, no other new plant in the Hardy Perennial class attracted such great attention. This new type originated through the successful crossing of the early-flowering popular Phlox Divaricata Canadensis with the showy hardy herbaceous varieties of Phlox Decussata. The plants are of vigorous, branching habit, growing, according to the variety, from twelve to twenty-four inches high. Coming into flower during the latter part of May, they continue in good condition for nearly two months.

From a large number of varieties, the introducer has selected five of the most distinct sorts which we now offer for the first time.

Charlotte. Grows eighteen to twenty-four inches high, flowers very large, pale lilac shaded pink, with a prominent dark eye; one of the best.

Grete. Plant of very branching habit, twenty inches high, producing great masses of medium-sized white flowers.

Helene. Of a beautiful lavender-blue color, similar to Divaricata Canadensis, shapely plant, fifteen to eighteen inches high.

Kathe. Stems loosely branched, about twenty inches high, flowers purplish-rose, with a dark eye, surrounded by a lighter halo.

Lulse. A strong-growing variety, about two feet high, light lilac flowers with a carmine eye.

Price. 35 cts. each; \$3.50 per dozen. One each of the 5 varieties for \$1.50.

New Phlox, *Pilosa Splendens*.

A splendid companion to Phlox Divaricata Canadensis, growing from twelve to fifteen inches high and flowering at the same time, but producing great masses of brilliant rosy-carmine flowers. An excellent border plant. 25 cts. each; \$2.50 per dozen.
